

CYTK QUICK REFERENCE GUIDE

Comprehensive content in the palm of your hand

CYTK's Smart Search allows technicians to access key repair information, specifications and procedures on a mobile device. With OEM content via MOTOR for 35+ OEMS Brands for model years 1990 through current, it's never been easier to get the info you need, whenever (and wherever!) you need it.

KEYWORD SEARCH BY COMPONENT

Type a component/keyword, select a category and get the data you need, right at the vehicle. Keep search terms simple for broader content results within a category. Add additional words to narrow the results but be cautious as each search term must match.

SCAN A VIN USING THE PHONE CAMERA

Click on 'Add Vehicle', then select 'Scan a VIN'. Make sure to 'Allow Camera Access' if prompted, then center the car VIN within the camera view. Use the camera's brightness functions to improve lighting, if needed.

WIRING DIAGRAMS NOW AVAILABLE

NEW

Access OEM wiring diagrams on your mobile phone and view details with the pinch and zoom feature. Enter a search term and select the Wiring Diagrams category to access results.

YOUTUBE VIDEOS IN PROCEDURE VIEW

In addition to OEM content, all service procedures include up to 10 YouTube Videos. Simply click on the red YouTube icon in the title area and browse related videos.

TECHNICAL SERVICE BULLETINS (TSB)

NEW

Direct access to OEM Technical Service Bulletins are now available on a mobile phone! Enter a keyword or component name in search field and select the TSB category to access results.

RECALL INFORMATION (NHTSA)

Get recall information for a specific Year, Make, and Model. Click on the vehicle menu at the bottom left and select "Recall (NHTSA)" for a list of active recalls for the vehicle in context.

QUICK REFERENCE GUIDES

Access our AI-generated repair summary guides in the bottom navigation. Here you will find the Quick Service Summary, Fluid Capacity Specs, A/C Specs, Brake Rotor Specs and Torque Specs.

ILLUSTRATIONS AND FIGURES

View detailed component location and illustrations published by OEMs within the app. Many procedures include these - look for a 'FIGURES' slide above the bottom navigation.

SEARCH BY VOICE WITH SMART TALK™

BETA

CYTK's SmartTalk™ is currently in BETA. With our AI-enabled voice search you can ask a question and get an answer, without setting down your tools or moving from the vehicle.

Say 'OK CYTK' (Pronounced "Sigh-Tech") then state your inquiry. Try these commonly used terms: "Engine oil type" or "Drive belt replacement procedure" or "How to reset oil engine light"
