Release Notes

What's new in both iOS & Android Apps

Features & Improvements

- A Help menu is now available when a vehicle is in context
- A new Coachmark-style slideshow now appears once when a user loads a vehicle into context for the first time
- Wiring diagrams now have clearer descriptions in detail view

What's new in Android v 1.1.0

Bug Fixes

- Spaces are now trimmed when entering a user name in the Sign In fields
- TSB view is now consistent with iOS'
- VIN Scan feature now includes more comprehensive loading indicator while processing the VIN image

What's new in Machine Learning & Content

Content Features & Improvements

TSB Improvements

- TSB Document number and release date are now included in the summary view
- All TSBs are returned if no match on a search query is found

Bug Fixes

Specifications

- Fluid Type and Fluid Capacity are now accurately displayed
- Fluid Type content is now returned along with Capacity when searching for fluid specifications

Figures

- Content is now filtered when MOTOR returns a search result with 0 items

What's new in Enrollment

Features & Improvements

General

- Updated the SFDC Record Owner to Travis on enrollment lead record creation
- UI updates to match current branding
- Removed default Subscription from enrollment form so the user now has to choose Team (RT2) or Individual (DIY)

User Verification Features

- Rooftop Admins, Individuals, and Workers can now verify their email addresses
- Verification status is accurately reflected in the Admin Dashboard and SFDC

SMS Notifications

- Added Verification SMS notifications for Rooftop Admins and Individuals

Admin Dashboard

- Removed ability for Admins to manage their subscriptions via the Customer Portal
- Added ability for Individual users to manage their billing via the Customer Portal
- Changed "Manage Subscription" to "Manage Billing"
- User status indicators are now accurately depicted in the user list
- Added feature to support more than 25 Users with an RT3 subscription

Bug Fixes

Password Reset

- Changed wording on Password Reset that genericizes the process
- Password Reset process now has branded HTML pages

Linked Lead Records

- Sending an email to an Existing lead with the querystring values that connect enrollment to the existing lead record now works properly
- Customer Type now accurately reflects the choice made on the enrollment form (RT2 or Individual)

Admin Dashboard

- Customer Type now accurately depicted in interface
